

FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-019	19. To verify that the "Password is encrypted without clicking on the eye button"	1.Application site should be working. 2.Internet should be available on device.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the "Valid Mobile Number" Step-05: Enter the "Valid Password" Step-06: Verify that "Password is Encrypted"	Step-01: Site: https://vishvas.in Step-04: Password Field post123	EXP-01: Password Should be encrypted without clicking on the eye button.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-020	20. To verify that the "Password can copy & paste from other page to registration page"	1.Application site should be working. 2.Internet should be available on device.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Copy the password from any other page Step-05: Come to the "Registration Page" Step-06: Paste that Password in Password Field	Step-01: Site: https://vishvas.in Step-04: Password Field post123	EXP-01: Password Should be copy & paste from other page to registration page.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-021	21. To verify that the "Password that was written cannot be copied and pasted on the another page"	1.Application site should be working. 2.Internet should be available on device.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the password in password field Step-05: Copy that password Step-06: Paste that password on other page	Step-01: Site: https://vishvas.in Step-04: Password Field post123	EXP-01: Password should not copy and paste from registration page to another page.	Obs-01: User is able to copy the password from password field and is able also to paste that password in another page.	Fail	Ability to Copy and Paste Password from Password Field Pose Security Risk. This defect represents a critical security vulnerability wherein users can easily copy passwords from the password field and paste them into other pages or applications. Such behavior significantly compromises the security of user accounts and poses a grave risk of unauthorized access to sensitive information.
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-022	22. To verify that "user is not able to make any changes by client side scripting"	1.Application site should be working. 2.Internet should be available on device.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Click "Right" Button Step-05: Enter "Script" on the "Password" field Step-06: Delete any code from Input page	Step-01: Site: https://vishvas.in Step-04: Password Field post123	EXP-01: User should not allow to make any changes by Client Side Scripting.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-023	23. To verify that the "Phone Verification Page" is displaying after clicking on "Create account" button	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Verify that "Phone Verification Page" is displaying	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: "Phone Verification Page" should display after clicking on "Create Account" button.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-024	24. To verify the "Verification Code" functionality by providing "Valid Credentials and Wrong OTP"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Enter the Wrong OTP in "Verification Code Field" Step-11: Click on "Verify" Button	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: Registration should not be done. EXP-02: Error Message should be display.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-025	25. To verify the "Verification Code" functionality by "Not Providing the OTP"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Enter the "Verification Code Field" Blank Step-11: Click on "Verify" Button	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: Registration should not be done. EXP-02: Error Message should be display.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-026	26. To verify the "Verification Code" functionality by providing "Valid Credentials and Expired OTP"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Enter the expired OTP in "Verification Code Field" Step-11: Click on "Verify" Button	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: Registration should not be done. EXP-02: "Invalid Code" This Message should be display.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-027	27. To verify the "expiry time of OTP"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Generate the OTP Step-11: Record the time at which the OTP was generated Step-12: Wait for some time (10 the OTP get expired) Step-13: Click on "Verify" Button	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: Expiry time of OTP should be more than 50 seconds. EXP-02: Registration should not be done.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-028	28. To verify that the "system is generating new OTP after the expiry time only"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Generate the OTP Step-11: Again generate the another OTP before Old OTP get expired	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: System should generate new OTP after the expiry time only.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-029	29. To verify the working of registration Functionality By "Using Previous OTP before expiry time"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Generate the OTP Step-11: Again generate the another OTP before Old OTP get expired Step-12: Enter the Old OTP Step-13: Click on "Verify" Button	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: Registration should not be done. EXP-02: Another OTP should not generate until previous OTP gets expired.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-030	30. To verify the "limit for generating the OTP for single user in one Time"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Generate the OTP Step-11: Again try to generate the another OTP before Old OTP get expired	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: Single user should be able to generate the OTP for only in one time EXP-02: Single user should be able to generate another OTP after expiry time only.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-031	31. To verify that the "user is being temporarily blocked by the system by doing several unsuccessful OTP attempts"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Enter the expired OTP in "Verification Code Field" Step-11: Click on "Verify" Button Step-12: Repeat step-05 & Step-11 again and again	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: User should be temporarily blocked by the system by doing several unsuccessful OTP attempts.	Obs-01: User is not getting temporarily blocked by the system by doing several unsuccessful OTP attempts.	Fail	This defect poses a significant security risk as the system fails to temporarily block users after multiple unsuccessful OTP attempts, without this subsequent malicious actors could repeatedly try different OTP combinations until they gain unauthorized access to user accounts, potentially compromising sensitive data and exposing the system to security breaches, urgent attention is needed to implement proper mechanisms for temporarily blocking users after a specified number of unsuccessful OTP attempts. This will help mitigate the risk of unauthorized access and enhance the overall security posture of the system.
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-032	32. To verify that OTP is "Case Sensitive"	1.Application site should be working. 2.Internet should be available on device. 3.User must have an active mobile number.	Step-01: Open the site Step-02: Click on "Sign Up" Button given on right side of header Step-03: Click on "Register New" link given on login page Step-04: Enter the valid "Full Name" Step-05: Enter the valid "Mobile Number" Step-06: Enter the "Valid Password" Step-07: Enter the "Name password" in "Confirm Password Field" Step-08: Click on "Terms & Condition Checkbox" Step-09: Click on "Create Account" Button Step-10: Verify whether received OTP is case sensitive	Step-01: Site: https://vishvas.in Step-04: Full Name Field-Just Character Step-05: Phone Number Field-724742407 Step-06: Password Field post123 Step-07: Confirm Password Field post123	EXP-01: OTP should not be case sensitive.	Obs-01: As Expected	Pass	
FR-BG-01	Registration	To verify the working of "Registration" functionality	FR-BG-TC-033	33. FM-LOG2N-02	Log In	To verify the working of "Login" functionality	FM-LOG2N-TC-076	1. To verify that the "user is being temporarily blocked by the system by doing 4 unsuccessful Login attempts"	1. Application she should be working. 2. Internet should be available on device.	Step-01: Open the site Step-02: Click on "Sign In" Button given on right side of header Step-03: Enter the "Invalid Password" in "Password Field" Step-04: Enter the "Invalid Password" in "Password Field" Step-05: Click on "Remember me" checkbox Step-06: Click on "Login" Button Step-07: Repeat the above steps 4 times	Step-01: Site: https://ethiopia.in Step-02: Phone Number Field: 752474040 Step-03: Password Field: 807974376 Step-04: Password Field: Invalid Password Step-05: Site: https://ethiopia.in Step-06: Phone Number Field: 752474040 Step-07: Password Field: Invalid Password	1. EXP-02 User should temporarily blocked by the system by doing 4 unsuccessful Login attempts	1. Obs-02 User is not getting temporarily blocked by the system by doing 4 unsuccessful Login attempts	Fail	The system allows users to make multiple unsuccessful login attempts without any temporary block or lockout. This absence of a lockout mechanism poses a security risk as it allows the system to remain vulnerable to brute force attacks, where attackers can repeatedly try different login combinations to gain unauthorized access. Implementing a temporary lockout after a specified number of failed login attempts, such as four consecutive failures, is critical to enhancing system security and mitigating the risk of unauthorized access.
FM-LOG2N-02	Log In	To verify the working of "Login" functionality	FM-LOG2N-TC-077	1. To verify that "Login session is expired after using Logout functionality only"	1. Application she should be working. 2. Internet should be available on device. 3. User must have a registered account.	Step-01: Open the site Step-02: Click on "Sign In" Button given on right side of header Step-03: Enter the valid "Phone Number" in "Password Field" Step-04: Enter the "Invalid Password" in "Password Field" Step-05: Click on "Remember me" checkbox Step-06: Click on "Login" Button Step-07: Keep the login page open for several hours Step-08: Do not run out system Step-09: Verify the Login process	Step-01: Site: https://ethiopia.in Step-02: Phone Number Field: 752474040 Step-03: Password Field: pass123	1. EXP-02 Login session should be expired after using Logout functionality only	1. Obs-02 Login session is getting expired without using Logout functionality	Fail	The system allows user login sessions to expire without requiring explicit logout. It may lead to data loss or inconsistency if sessions expire before users have a chance to save their work. From a user experience perspective, it can be frustrating and disruptive to have sessions expire unexpectedly, especially if users lose progress on tabs.
FM-LOG2N-02	Log In	To verify the working of "Login" functionality	FM-LOG2N-TC-078	1. To verify that "Login is still done by deleting internet server just after completing the Login process"	1. Application she should be working. 2. Internet should be available on device. 3. User must have a registered account.	Step-01: Open the site Step-02: Click on "Sign In" Button given on right side of header Step-03: Enter the valid "Phone Number" in "Password Field" Step-04: Enter the "Invalid Password" in "Password Field" Step-05: Click on "Login" Button Step-06: Click on "Remember me" checkbox Step-07: Promptly click on Internet server Step-08: Verify the "Login Process"	Step-01: Site: https://ethiopia.in Step-02: Phone Number Field: 752474040 Step-03: Password Field: pass123	1. Step-01: Open the site Step-02: Click on "Sign In" Button given on right side of header Step-03: Keep the "Phone Number" field blank Step-04: Keep the "Password Field" blank Step-05: Click on "Remember me" checkbox Step-06: Click on "Login" Button Step-07: Verify the Notification Color on field areas	Step-01: Site: https://ethiopia.in	1. EXP-02 Placeholder colour should be change after not providing mandatory data	1. Obs-02 As expected	Pass	

FR-MYACC-04	My Account	To verify the working of "My Account" Functionality	FR-MYACC-TC-008	08. To verify the working of "New Address" functionality by providing "valid credentials and Invalid Address"	<p>1.Application shd should be working.</p> <p>2.Internet should be available on device.</p> <p>3.User must Login the account.</p>	<p>Step-01: Open the site</p> <p>Step-02: Click on "My Account" Button given on right side of header</p> <p>Step-03: Click on "Manage Profile"</p> <p>Step-04: Click on "Add new address"</p> <p>Step-05: Select valid country</p> <p>Step-06: Select valid state</p> <p>Step-07: Select valid city</p> <p>Step-08: Enter valid postal Code</p> <p>Step-09: Enter valid Phone</p> <p>Step-10: Click on Save button</p>	<p>Step-01: http://localhost</p> <p>Step-02: Address field: Invalid address- Hf9J jh</p> <p>Step-03: Postal code field: 43305</p> <p>Step-04: Phone field: 752474047</p>	Exp-001_New Address should not be Saved	Obs-001 New address is getting saved	Fail	<p>In the "New Address" saving feature, users can save their address information by providing valid credentials. However, the system allows the saving of address even when user input invalid address details. The system lacks proper validation for address details during the saving process, permitting users to submit invalid address information without detection. It may lead to redundancy of packages, inaccurate location data, and customer dissatisfaction.</p>

FN-LOGOUT-11	Login	To verify the working of "Logout" functionality	FN-LOGOUT-TC-597	8. To verify that "User's session is expired after using logout functionality only"	<p>1.Application site should be working.</p> <p>2.Internet should be available on device.</p> <p>3.User must Login the account.</p>	<p>Step-01) Open the site.</p> <p>Step-02) Keep the Home page open for several hours.</p> <p>Step-03) Do not turn off the system.</p> <p>Step-04) Verify whether account gets logout automatically.</p>	Step-01) Site: https://t3.vtub4b.in	Step-01) User's session should be expired after using logout functionality only.	Obs-01) User's session is getting expired without using logout functionality.	Fail	The system allows user sessions to expire without requiring explicit logout. It may lead to data loss or unnecessary sessions expire before users have a chance to save their work. From a user experience perspective, it can be frustrating and disruptive to have sessions expire unexpectedly, especially if users have progress on tabs.
FN-LOGOUT-11	Login	To verify the working of "Logout" functionality	FN-LOGOUT-TC-598	9.
